

Aanchal Routela

Aspiring AI Product Manager | Data Science & Applications Student, IIT Madras

New Delhi, Delhi, India | aanchalroutela01@gmail.com | +91-7303916723 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Science and Applications student at IIT Madras moving into AI Product Management. Comfortable on both sides of the table, running user interviews and writing PRDs on one end, reading SQL and following API requirements on the other. Project work spans GenAI and B2B retail products, covering discovery, requirements, prioritization, and Agile delivery from idea to shipped feature.

CORE SKILLS

Product: Product Discovery, User Research, PRDs, User Stories & Acceptance Criteria, Feature Prioritization (MoSCoW), Roadmapping, Agile/Scrum, Cross-Functional Collaboration, Data-Driven Decision Making

Tools: Jira, Power BI, Excel

Technical Foundation: Python, SQL, applied data analysis (from IIT Madras Data Science coursework)

CERTIFICATIONS

- SQL (Intermediate) | HackerRank
- Product Management Virtual Experience Program | Forage

PROJECTS

Sonik : Smart Retail Management System (AI-Powered Retail Platform) | Product Management & Scrum

- Owned the **product lifecycle** end to end for a 5-member Agile team, from problem discovery and user research through requirements, prioritization, and delivery across 5 milestones.
- Ran **semi-structured interviews** across 6 user personas and converted the findings into **25+ SMART user stories, acceptance criteria**, and functional/API requirements covering core retail workflows.
- Prioritized the backlog using MoSCoW, led **sprint planning and milestone tracking**, and worked with engineers on the platform's AI-powered business assistant.

Virtual Teaching Assistant | RAG System Design & LLM Application

- Built a **RAG-based AI teaching assistant** integrating multiple knowledge sources to resolve student queries, including edge cases where single-source retrieval was insufficient.
- Implemented **source attribution** and **answer verification** against course materials to evaluate response reliability, mitigate **LLM hallucinations**, and improve trust in AI-generated outputs.

Grocery Gateway | Business Analytics & Consulting project

- Analyzed **sales, inventory, customer credit, and seasonal data** for a small retail business to identify recurring issues : **inventory misplacement, outstanding debts, and seasonal demand swings**.
- Translated the analysis into **product and operations opportunities** around inventory tracking, debt management, and demand planning.
- Used a **structured, data-first** approach to move from **raw business data** to prioritized problem areas and specific recommendations.

EDUCATION

Indian Institute of Technology Madras | Chennai, Tamil Nadu | 2023 - Present

B.S. in Data Science & Applications | Minors: Generative AI; Cloud Computing for AI

Panchsheel Public School | New Delhi, India

Class XII | CBSE | 2023

Class X | CBSE | 2021
